Foreword by **Guruji (Acharya Varenya)**

“Astrological readings are sacred and karmic. Money taints the purity of the exchange.”

For decades, I have quietly guided those who left their homeland in search of success but found themselves burdened by unseen anxieties, restless minds, broken/troubled relationships, and karmic disconnection.

You wear the world's success, but your soul still whispers in the language of the land you left. I have walked beside many such seekers — CEOs, artists, politicians — helping them remember who they truly are beneath their passports, portfolios, and pain.

NavYantra 2025 is my offering to restore that sacred alignment — simply, silently, powerfully.

When NavYantra realigns your stars and you start living a balanced, prosperous and full life, as always I expect only one thing in return ;

Donate to any charity of your choice . Help friends and family to achieve the same balance by telling them about NavYantra. Your prosperity will keep increasing.

Remember positive energy, propserity, harmony multiplies when it is spread.

Introduction – A Journey Far From Home

You packed your dreams, left your homeland, and built a new life abroad. But somewhere between chasing success and settling in, a strange feeling crept in: things just weren't falling into place.

You're working hard, but results feel delayed. Relationships seem misaligned. Health dips without reason.

Could it be more than stress or bad luck? Could it be... the stars?

Vedic Astrology Meets Geography.

In Vedic astrology, the influence of stars and planets on your life is deeply connected to your place of birth. Just like the sun feels hotter near the equator and barely shows up near the poles, the subtle cosmic energies of other planets shift with geography.

Other Planets like Mangal (Mars), Shani (Saturn) effect your career, health, relationship differently in, lets say USA then India.

Your horoscope was created for your birth location.

When you move 2000+ km away, especially to another continent, the planetary alignments impact you differently.

This shift in planetary alignment can take its effect from 6 to 18 months after you move away from your place of birth.

**72.45 % of our NRI responders
felt the shift within the first six months**

What Happens When You Relocate

- Your planetary influence zones change
- Emotional cycles may shift without explanation
- Long-term plans get delayed
- Relationships feel out of sync
- Physical and mental energy fluctuate

This isn't superstition. It's the natural energetic shift caused by your distance from the birthplace.

We all know that Solar and Lunar Eclipse have a huge impact on our lives.

Ask yourself, “are they of the same intensity and duration in your current country compared to your birthplace back in India ? ”

The answer will be a resounding “No”.

So the effect of either or both eclipses on you, in your current country/city of residence is not the same as that is felt in India.

You need a solution.

Are Your Stars Misaligned? (Self-Check)

Answer Yes/No:

1. Have you felt unusually stuck, despite effort?
2. Are your sleep, mood, or relationships unpredictable?
3. Do you feel your intuition has dimmed since moving?
4. Are you facing recurring issues with work or health?

If answer to two or more questions is “Yes”
then
your astro-alignment is disrupted.

This Imbalance affects our work, health and
our relationships.

The impact is worst on our Children.
